

STR1 LASER

The STR1 is a quick, simple and accurate cordless laser wheel alignment system from Supertracker.

An easy to use 'hang on' system which eliminates potential damage some clamp systems may cause and allows the wheel hangers & measuring heads to be calibrated as a unit. Measuring heads are conveniently re-charged when placed on the unit.

Available as a trolley or wall hung, both allow checks to be done anywhere in the workshop, without being anchored to one-bay

A trusted and robust wheel alignment solution offering a quick return on investment.

Effective hang on system

Can be upgraded to measure
Camber and Castor

Available as a wall hung space
saving solution
